

# September 2022

Last Modified on 10/14/2022 4:48 pm EDT

## September 2022 – What's New?

### Expanded the Maximum Participants to 20 People per Call

#### Summary

We have received several requests asking if we could expand the max number of participants allowed. To accommodate larger meetings and ensuring we maintain our standard performance, we have expanded to a max of 20 participants; whereas previously, you could only have a maximum of 12 participants.

### Added a Desktop Notification/Sound When a Participant Enters

#### Summary

Previously with VC1.0, we Users were able to utilize browser notifications for whenever a patient enters the waiting room. We have added this functionality to VC2.0 following the feedback we received from our customers.

### Modernized Inbox Item Color Theme

#### Summary

We have updated the display of existing item colors starting with a thin rectangle followed by the same color with 12% opacity for the rest of the colored display area – spacing between items should remain as-is.
