

Release Notes

Last Modified on 02/18/2025 11:56 am EST

December 2024

New: Forms Dashboard

Updox is excited to launch our new Forms Dashboard. With Updox's Forms Dashboard, you can now:

- Connect forms to a specific patient at the time of send
- Make packets (a grouping of forms) to send to your patients with only one URL
- Track patient progress and see the status of form assignments
- Send them a reminder to complete their forms
- Create and edit your forms in the same place

The screenshot shows the Updox Forms Dashboard interface. At the top, there's a navigation bar with 'Forms', 'Dashboard', and 'Management' tabs, and a 'Send Forms' button. Below the navigation, there are three dropdown filters: 'Patient' (with a search field 'Search by First or Last Name'), 'Status' (with 'Select an option'), and 'Appointment' (with 'All'). The main content is a table with columns: Patient Name, Form Name, Status, Next Appointment, and Action. The table lists six entries for different patients, including their email addresses, form group names, send dates, and current status (e.g., 'In Progress: 1 of 2', 'Sent', 'Completed').

Patient	Form Name	Status	Next Appointment	Action
<input type="checkbox"/> Joe Sample Email: sample@email.com	Form Group 2 Send Date: 10/02/2024 at 1:11 p.m.	In Progress: 1 of 2	10/02/2024 1:00 p.m.	Send Reminder
<input type="checkbox"/> Test Patient Email: sample@email.com	Form Group 3 Send Date: 10/01/2024 at 1:16 p.m.	Sent	10/02/2024 2:00 p.m.	Reminder Sent: 10/01/2024 at 2:03 p.m. Send Again?
<input type="checkbox"/> John Sample Email: patient@sample.com	Form Group 3 Send Date: 10/01/2024 at 1:16 p.m.	Completed	10/02/2024 1:00 p.m.	Send Reminder
<input type="checkbox"/> Laurie Sample Email: sample@fake.com	Form Group 3 Send Date: 9/30/2024 at 1:31 p.m.	Completed	10/02/2024 1:00 p.m.	
<input type="checkbox"/> Test Sample Text: (410) 555-5555	Form Group 2 Send Date: 9/30/2024 at 11:23 a.m.	Completed	10/02/2024 2:00 p.m.	

Please see our articles on the Forms Dashboard for more information.

Variables Are Now Optional in Reminders Scripts

Previously, when configuring scripts for Reminders, there were certain fields we required customers to include in scripts, like [firstname] or [date].

However, we have heard from some customers that there are situations when including a patient's name can be a negative experience for the patient.

We want to give our customers the flexibility to create scripts that work for them and their patients, so we made all the variables in Reminder scripts optional. Going forward, customers can create Reminder scripts without any variables.

Text Script

Script Name
My Custom Script

Active
 Default text script

Personalize your message
Use the variables below to personalize your message. Variables will always appear in English

- [firstname]
The patient's first name
- [date]
The date of the appointment
- [time]
The time of the appointment
- [type]
The type of the appointment
- [location]
The location of the appointment
- [address]
The address of the location or practice
- [with]

Manage Script content and languages
When making changes to a script, update all language versions to maintain consistent messaging.

English Message
Hi, you have an upcoming appointment soon. 

Warning: Patient Reminders are not a HIPAA-compliant method of communication. Refrain from entering any PHI in the message contents.

August 2024

Fax Blocklist Upgrade

We upgraded our Fax Blocklist. Now you can see who blocked a fax, when, and the reason why! Read more about it here - <https://help.updoox.com/help/fax-blocklist-overview>.

Menu | **updoox** |  |

(987) 654-3210	Shiela Rao-Lasota	05/29/24	Suspicious	

April 2024

Cancel Faxes

Have you ever sent a fax to a wrong number? Now you have a chance to cancel it! We added the ability to cancel a pending fax in the Outbound Faxes page.

For more details on how to cancel a pending fax, see our article here - <https://help.updox.com/help/cancelling-a-pending-fax>.

March 2024

Release of Information ChartSwap Integration

Updox has partnered with [ChartSwap](#) to help simplify the exchange of patient records between healthcare providers and requestors (law firms, record retrieval organizations, insurance companies, etc). This means that requestors who use ChartSwap can search for your organization and send record requests electronically directly into the Updox **Release of Information** app. A release of information message will hit your Inbox when you receive one of these requests. You can then use the **Release of Information** app to collect and organize the requested documents, just like you can with record requests you create. When you have everything pulled together, you can quickly return the records to the requestor with a single click.

For more information on this integration or our **Release of Information** app, see our article here - <https://help.updox.com/help/release-of-information-chartswap>.

February 2024

SMS Send From Numbers

We have added default information to the numbers used in sending SMS texts. You have the option to select a 'Send From' number for a location or queue when sending SMS text messages. If you do not select a location or queue, the message will be sent from your default practice location.

The screenshot shows a 'Send a Text Message' dialog box. At the top, there are radio buttons for 'Secure Text' and 'SMS Text', with 'SMS Text' selected. Below this is a 'Send to *' search field with the placeholder text 'Search by name, type number, or email...'. Underneath is an 'Assign to a queue' dropdown menu with the text 'Select a queue...'. A note below the dropdown says 'Auto-sort incoming messages and responses with workflow queues' with a 'Learn More' link. At the bottom, there is a 'Default (i)' field containing the number '+18881234567' and an 'SMS Approved' icon.

Below the main dialog, two callout boxes provide additional information:

- The first callout points to the 'Default (i)' field and states: 'The SMS number used when no Location is selected.'
- The second callout points to the 'Default (i)' field and states: 'The SMS number used when no Queue is selected.'

If your default location does not have an approved number, you can request a number.

January 2024

New Telehealth URL

We have added the ability to add the link for a Public Waiting Room to reminders to simplify your Video Chat text and email reminder workflow.

Once the link is set up, select it from the new Public Waiting Room dropdown.

Next, when setting up or editing your text or email reminder scripts, you can select the `[telehealthurl]` variable to link the waiting room you set up.

For more information see our article [Adding a Waiting Room Link to Your Reminders](#).

SMS Send From Numbers

You will soon be able to view the SMS numbers assigned to your practice (as well as queues or locations) as you are sending an SMS text message. Along with the number, we will display the carrier approval status so you know if the number is ready to be used. You will also be able to add a number to the location or queue if it does not have one already assigned.

December 2023

EHI Export

We have completed our EHI Export process in order to provide self-service access to export data from Updox at a practice or patient level in accordance with the 21st Century Cures Act.

With EHI Export you can export data for a single patent or your practice. You can also export data from a certain date range. Once the data is ready, you have 30 days to download it.

For more information on EHI Export see our articles [here](#).

November 2023

Create a Release of Information request from an Inbox Item

You can now create a Release of Information request from items you receive in your Inbox. Select the item and click **Create ROI Request** to get started with your request.

Learn more about Release of Information [here](#).

October 2023

Updated Download Fax Button

We have updated the download fax button on the Outbound Fax page. You can download a PDF file of only the fax, or you can download a PDF file of the fax that also includes the confirmation page.

Removal of "Non-patient" Language

We have removed the description of "non-patient" and "a non-patient" for forms that were submitted where the patient was not already authenticated.

Payment Reason Added to Updox Payments Excel Dashboard Export

We have added a Payment Reason column to the Excel export for Updox Payments.

H	I	J
Status	Payment Reason	Requested Amount

September 2023

Fax Dashboard Updates

We have updated the Outbound Faxes dashboard to include 'search' on date ranges and arrows for you to quickly jump back and forth between days.

Family Practice Tue, 10/03/23 12:55 PM EDT

The fax to Sample Doctor at 4105555555 was successfully delivered at Tuesday, October 3, 2023 12:55:06 PM EDT. 1 page.

August 2023

Printer User Mapping Update

We have updated our Printer User Mapping interface to make it easier for you to manage your incoming print jobs and users. For more information on Printer User Mapping see our [article](#).

Resolution: Timestamp Timezone

We have resolved an issue in which the timestamps on certain messages were reflected in the UTC timezone instead of the local or set timezone.

July 2023

Fax Numbers Tab

We have added a Fax Numbers tab for you to access your inbound fax numbers. The Fax Numbers tab can be accessed from the Menu by selecting Fax Settings. You can manage the inbound fax numbers here and nickname them for easier distinction and searchability.

June 2023

June 2023 – What's New?

New User-Printer Mapping Setting

Overview

We have implemented a new setting located in *Menu > Admin > Printer User Mapping* which grants Admins the ability to prevent unmapped users from sending items to the Inbox.

If a print is attempted by an unmapped user, Updox will reject the print job and will return an error message within the printer application. The error message should read "You can not print because you are not a mapped user. Please see your admin for assistance."

NOTE: If a printer is using direct credentials or there is always a mapped user, this new setting does not apply.

Updated Version Numbers

We have updated our version numbers to reflect the latest [ONC certification](#). The version number can be found in your Updox account under the **Menu**.

May 2023

May 2023 – What's New?

Appointment Bundling Template

Overview

Appointment Bundling is a feature that can be enabled within your Reminder Settings that allows for the ability to send all same-calendar day appointments for a patient into a single reminder message. In other words, if 'Patient A' has 3 (three) back-to-back appointments on the same calendar day (or within the Appointment Filter's set timeframe), with Appointment Bundling enabled, the reminder message will state that *they have 3 appointments on that day for time 1, time 2, and time 3*. Patients can also confirm or cancel all appointments within the bundled reminder.

Enabling Reminder Appointment Bundling

You may enable this feature within the Admin Reminder Settings page by going to Menu → Admin → Reminders → scroll down until you find the "Appointment Bundling" checkbox shown below. Appointments will be bundled within the timeframe that is selected within the Appointment Filtering settings.

Turn on appointment filtering for patients who have multiple appointments

Filter out reminders for patients with multiple appointments scheduled within: ▼

- 1 hour
- 2 hours
- 4 hours
- Same day

Heads Up! To enable this feature, you must also have Appointment Filtering turned on.

Message Template

When this setting is enabled, you may use the designated template to send your patients a message following the template below:

- "You have an appointment with [with] at [location] at [time] and an appointment with [with] at [location] at [time] "
 - The, "and an appointment with [with] at [location] at [time] " will be repeated for each additional appointment within the day (timeframe).

A template will be utilized in the Reminders UI to use this template and the overall message can be customized with additional messaging. If the bundling setting is not turned on, customers will not be able to use the template. The template to use is denoted in the Reminders script UI when you are updating or creating a Reminders script. To use the appointment bundling template, the template is [apptbundling].

- [apptbundling]
Bundle appointments based on the timeframe set in your appointment filtering settings. Appointments scheduled in this set timeframe will be bundled into a single reminder. Includes [with], [location], and [time] variables for each.

NOTE: With delivering the bundled appointment reminder within a single message, patients will be given the ability to either confirm or cancel *all* of their appointments included.

April 2023

April 2023 – What's New?

Create Placeholder Thumbnails on Retrieval Timeout

Overview

When a user logs in to the inbox, the page will begin grabbing thumbnail images for the folder items that are visible. However, if there are issues with the thumbnail servers or file-storage backend, the thumbnails will either take a very long time to load or will never load.

We have now defined a timeout threshold for the loading of thumbnail images. When the loading of thumbnail images exceeds this threshold, we should display a placeholder thumbnail and allow actions to be taken as if the original thumbnail image was loaded.

March 2023

March 2023 – What's New?

Enforced Password Complexity on Reset

Overview

If a user utilizes the “Forgot Password” feature, they will need to adhere to the following guidelines when setting their new password.

The new password must:

- Be at least 10 characters long
- Be no more than 2 identical characters in a row
- Must meet all of the following:
 - Uppercase character (A-Z)
 - Lowercase character (a-z)
 - Have either of
- Number (0-9)
- Special character (punctuation)
- Password submissions are rejected if the above criteria are not met

Broadcast Changes

Overview

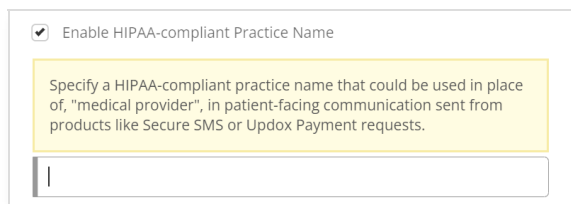

To adhere to the new regulations outlined in the [SMS Compliance Article](#), all Broadcast messages that are sent as

a text message will be moving to a new standard format. This standard format will aid in the messaging verification process brought forward by carriers and will significantly decrease the likelihood of messages being filtered or blocked by carriers. The standard format that a recipient will see when they receive a Broadcast message via SMS will be as follows

Standard SMS format: Hello [First Name], you have a new message from [HIPAA Safe Practice Name*] at [weblink]

NOTE: If you do not have a HIPAA-compliant Practice Name configured, your standard practice name will default in for the SMS message.

If your practice has its HIPAA-compliant Practice Name set in the Practice Settings of the Admin tab in the Updox Inbox, that will be the practice name the recipient sees in the messages they receive from your practice. If not, they will see your standard practice name. To set your HIPAA-safe name, click on the Menu in the Updox Inbox > Admin > Practice Settings scroll down to the checkbox next to **Enable HIPAA-compliant Practice Name**, and click the checkbox. You can then enter your HIPAA-compliant practice name.

The screenshot shows a settings panel with a checked checkbox labeled "Enable HIPAA-compliant Practice Name". Below the checkbox is a yellow callout box containing the text: "Specify a HIPAA-compliant practice name that could be used in place of, 'medical provider', in patient-facing communication sent from products like Secure SMS or Updox Payment requests." Below the callout is a text input field with a vertical cursor.

Any existing Broadcast scripts sent via SMS that contain the [FirstName] variable will be replaced by "Recipient" within the content of the message behind the weblink to maintain HIPAA compliance. This will not apply to any Broadcast messages sent via email, portal, or voice.

Existing configurations that your practice has for any Broadcast messages will remain in place, and your practice will not be required to make any changes as the existing content will now simply be shown via the web application versus within the text message directly. Once again, this will aid in the newly required registration process and with message deliverability.

When Are These Changes Taking Effect?

We expect these changes to be rolled out by the end of March. Once an official date is decided upon, that date will be communicated to our customers. Our customers will receive additional communication leading up to the release of these updates to ensure transparency.

What Is Not Changing?

Any Broadcast messages being sent as email, voice calls, or portal messages will not be impacted by these changes.

What Do You Need To Do?

As previously mentioned, there is no work needed from you or your practice unless you want to set a HIPAA-compliant Practice Name. All of this behind-the-scenes work will be completed by Updox. All Broadcast SMS configurations that are in place will remain the same, and you will not have to make updates to previously created scripts.

February 2023

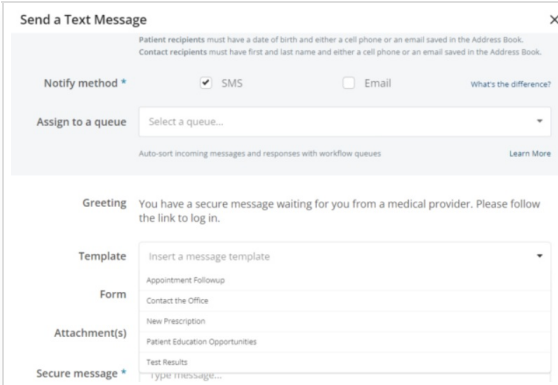

February 2023 – What's New?

'Type Ahead' Search Added for Templates in the SMS Window

Overview

We have added the ability to search and filter your template library when sending an SMS text message to ensure a quick and seamless selection process!

After clicking on the Template drop down, you may begin to type the name of your desired Template. Your options will be filtered in real time with each keystroke, similar functionality to the 'Assign to a queue' and 'Form' dropdowns.

The screenshot shows a 'Send a Text Message' dialog box. At the top, there is a note: 'Patient recipients must have a date of birth and either a cell phone or an email saved in the Address Book. Contact recipients must have first and last name and either a cell phone or an email saved in the Address Book.' Below this, there are two radio buttons for 'Notify method *': 'SMS' (checked) and 'Email'. To the right of the 'Email' button is a link that says 'What's the difference?'. Underneath is a dropdown menu for 'Assign to a queue' with the text 'Select a queue...'. Below that is a small note: 'Auto-sort incoming messages and responses with workflow queues' and a 'Learn More' link. The main section is for composing the message. It starts with a 'Greeting' field containing the text: 'You have a secure message waiting for you from a medical provider. Please follow the link to log in.' Below that is a 'Template' dropdown menu with the placeholder text 'Insert a message template'. Underneath the template dropdown is a 'Form' section with three text input fields: 'Contact the Office', 'New Prescription', and 'Patient Education Opportunities'. Below the form fields is an 'Attachment(s)' section with a text input field containing 'Test Results'. At the bottom, there is a 'Secure message *' section with a text input field containing 'type message...'. The dialog box has a close button (X) in the top right corner.

Tagging: Updated Interface and Look

Tags Menu

We have updated the look and feel of the Tags Menu (*Menu* → *Admin* → *Tags*) which displays your active and inactive tags and provides the ability to add a new tag, edit a tag's color or name, activate or inactivate a tag, order tags in your preferred order, and delete a tag.

Tag Color Customization

You are now able to completely customize your Tag color(s) by utilizing the newly added color wheel and brightness slider!

Reordering Tags

To reorder tags, hover your mouse over the double bar in the tag you want to move, then drag and drop it in the order you prefer. This order will be used everywhere where tags can be selected in the app like inbox items, forms, and advanced fax routing rules.

Editing Tags

To edit a tag, hover over an existing tag and click on the “Edit” icon.

From here, you can update the tag name and select a new color, and set the tag to active or inactive using the “Active” checkbox.

Applying Tags

You can tag items in your Updox inbox by clicking the tag icon located within the item's title and selecting the appropriate tag. The tags will be displayed in the order you set in the Tags menu. You can scroll the list of tags using your mouse or the `Up` and `Down` arrow keys, or you can type to quickly filter and find your tag.

A NEW VIDEO CHAT FEATURE IS COMING SOON!!! Stay tuned 😁

January 2023

January 2023 – What's New?

Expanded File Size Limit for Notes/Screenshots

Overview

We have received feedback from some of our customers regarding errors when attempting to send the notes summary page from a video chat session to the inbox due to the file size being too large.

In order to assist this, the file size limitation for when the notes summary page is sent to the inbox has been increased to 8mb! Therefore, if the notes and screenshots collected during a singular session call with a patient does not exceed 8mb, the summary notes page will now be successfully sent to the inbox. This will apply to multi-call patient journeys as well.

November/December 2022

November/December 2022 – What's New?

Introducing... Advanced Fax Routing

Overview

Advanced Fax Routing replaces the previous fax routing rules that could be found in the Fax Settings menu (*Menu* → *Admin* → *Fax Settings*). With Advanced Fax routing, you can now create rules that match on the from number of the incoming fax, along with the to number. This gives you the ability to create extremely specific rules and build workflows to match your office's needs.

You can build rules based on the *to* number:

- Tag all faxes to (614) 555-1545 to the "Rx refill" queue
- Tag all faxes to (614) 555-1090 to Dr. Stover's private inbox

Our powerful matching capabilities even allow you to match on partial *from* numbers:

- **Use area code matching (first 3 digits) to tag all faxes from a specific region:**
 - Tag all faxes from (614) xxx-xxxx with the "Central Ohio" tag
- **Use exchange matching (first 6 digits) to route all faxes from a local hospital to a queue:**
 - Route all faxes from (614) 566-xxxx to the "Riverside" queue
- **Use full number matching (all 10 digits) to tag all faxes from a payer:**
 - Tag all faxes from (800) 555-1100 with the "Blue Cross Blue Shield" tag

And of course, you can combine them:

- Tag all faxes from (888) 490-xxxx to (614) 555-2325 with the "Medical Records Release" tag

NOTE: This feature can be found by going to: *Menu* → *Settings* → *Advanced Fax Routing*

Actions

Customized actions which can be executed upon receipt of an inbound fax include tagging a specific tag, routing to a group, private inbox or queue, and forwarding the fax to one or more email addresses (on encrypted domains only, configurable by Updox Support).

Tagging

Users can optionally pick any active tag to assign to a matching fax, and the inbound fax will be correctly tagged.

NOTE: If the tag in question is inactive at the time the fax is received, or has even been deleted, the system will still apply the tag.

Routing

Users must choose a destination where the inbound fax should be placed. Available options are the Group Workspace (sometimes called the practice inbox), any active user's private inbox, and any active queue.

NOTE: If the chosen user or queue is inactive at the time the fax is received, the fax **will not** be sent to that inactive user or queue, and will instead be sent to the group workspace. Other actions, if present, will still be applied.

Emailing

The routing system also has the ability to forward faxes along to one or more email addresses (separated by commas).

Email routing rules are configured by Updox Support upon confirmation that the email address is on an encrypted domain.

Ready to get started? [Click here](#)

****COMING SOON** New & Improved Tagging System**

Overview

We're hard at work on some big improvements to tagging, both on the admin screen and in the inbox. Stay updated on these upcoming changes in next month's newsletter for more details!

October 2022

October 2022 – What's New?

Added 'Chat Support' Button to the Updox Inbox

We have officially added the ability for you to reach out to our Customer Support directly from your Inbox *for all strategies!* The "Need Help" button will be located in the *bottom-right* corner of your screen.

When reaching out to our Support team, please ensure that you have your **AccountID** at the ready! This can be found in the *bottom-left* corner of your screen!

NOTE: If you do not see the button pictured above, please disable any AdBlocker plugins that you may have running as the AdBlocker will prevent this button from appearing!

Additional Changes and Updates are COMING SOON!

September 2022

September 2022 – What's New?

Expanded the Maximum Participants to 20 People per Call

Summary

We have received several requests asking if we could expand the max number of participants allowed. To accommodate larger meetings and ensuring we maintain our standard performance, we have expanded to a max of 20 participants; whereas previously, you could only have a maximum of 12 participants.

Added a Desktop Notification/Sound When a Participant Enters

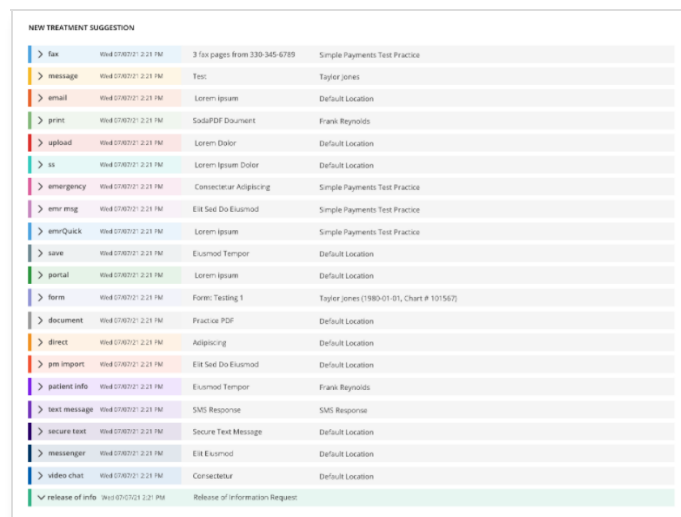

Summary

Previously with VC1.0, we Users were able to utilize browser notifications for whenever a patient enters the waiting room. We have added this functionality to VC2.0 following the feedback we received from our customers.

Modernized Inbox Item Color Theme

Summary

We have updated the display of existing item colors starting with a thin rectangle followed by the same color with 12% opacity for the rest of the colored display area – spacing between items should remain as-is.

August 2022

August 2022 – What's New?

Internet Explorer -- No Longer Supported

Summary

As of **June 15, 2022**, Microsoft announced the discontinuation of their web browser, Internet Explorer (IE). In doing so, this means that Microsoft will no longer provide support/assistance for the product or release security and performance updates.

Knowing this, Updox will also be discontinuing our efforts to maintain and support our product(s) within IE to ensure our customers are given the most up-to-date security and functionality.

"We are announcing that the future of Internet Explorer on Windows 10 is in Microsoft Edge. Not only is Microsoft Edge a faster, more secure and more modern browsing experience than Internet Explorer, but it is also able to address a key concern: compatibility for older, legacy websites and applications...

"With Microsoft Edge capable of assuming this responsibility and more, the Internet Explorer 11 desktop application will be retired and go out of support on June 15, 2022, for certain versions of Windows 10."

Source: *The Future of Internet Explorer*

Next Steps

If you currently utilize Internet Explorer as your main Web Browser application, we strongly advise that you begin using one of the following Web Browsers:

- Google Chrome
 - Click [here](#) to download Chrome.
- Microsoft Edge
 - Click [here](#) to download Edge.
- Mozilla Firefox
 - Click [here](#) to download Firefox.

NOTE: If you are still using Internet Explorer, our support teams will not be able to assist you.

July 2022

July 2022 – What's New?

Broadcast Enhancement

Added the Ability for Patient(s) to Opt-Out of Email Broadcasts

As an Updox Practice/Pharmacy, sending out bulk Broadcast Email Messages via the Broadcast product, your recipients now have the ability to request that they no longer receive future communications. (*Similar to the current functionality with Broadcast Texts*)

This will help us stay compliant with vendors and carriers and prevent any messages from being blocked.

NOTE: Updox is investigating a solution that would surface patients who have opted out of communications to ensure end users have visibility to track and manage which patients would not receive notifications. Timing is still to be determined

What to Know

- Emails sent via Broadcast will now include an "Unsubscribe" button present at the bottom of the email. Clicking the button will allow the recipient to deny receiving any further Broadcast Emails.
- Users will still be able to request a message in Updox to send a Broadcast to that email address, but the message will not be delivered.

Additional Information

In the event that one of your Patients wants to re-subscribe to the Broadcast Emails, please be sure to have the following information ready when contacting Updox Support!

- Your Updox Account Number
- The email address of the patient

Video Chat 2.0

Added "Patient Instructions" to the Help Menu

We have added an extra menu item to the "Help" menu with the title "Patient Instructions" in the participant's help menu only. This menu item upon clicking/pressing should open a new tab to the instructions [here](#).

'Gallery View' is Now the Default Viewing Option

Previously, when a host or participant would enter a call, it would default to the 'Dominant Speaker' view.

We decided to make this change after receiving some feedback from several practices including:

- Often times the Host needs to look for non-verbal cues from the participant
- The Host may feel like they are just talking to themselves while in the 'Dominant Speaker' view.

June 2022 – What's New?

Ability for Patients to Unsubscribe from Email

Broadcasts

Summary

As an Updox Practice/Pharmacy, sending out bulk Broadcast Email Messages via the Broadcast product, your recipients now have the ability to request that they no longer receive future communications. (*Similar to the current functionality with Broadcast Texts*)

What to Know

- Emails sent via Broadcast will now include an "Unsubscribe" button present at the bottom of the email. Clicking the button will allow the recipient to deny receiving any further Broadcast Emails.
- Users will still be able to request a message in Updox to send a Broadcast to that email address, but the message will not be delivered.

Updated Login Security

Summary

Ensuring the security of our customers and the patients they service is a top priority at Updox. We are bettering our current security features by transitioning to a new identity and access management system.

This transition allows Updox to update our current password policy, add multi-factor authentication (MFA), and strengthen our session expiration system to ensure compliance with current health industry best practices.

The updates and changes that are being made during our transition will be done "behind the scenes." Your typical workflow and interaction within Updox will remain the same and this change will not affect Users' day-to-day duties.

What to Know

The Log-In Page will look a bit Different

You will not need to change your login process at all. You will go to the same link/bookmark that you have now and the system will route you to the appropriate place automatically. The login page itself will look slightly different moving forward. In addition, you may notice a webpage redirect as you login.

Future Plans

The following features will be enabled by the new security framework, but will not be available immediately on your switch to the new login screen.

Multi-Factor Authentication (MFA)

Multi-factor Authentication (MFA) is an authentication method that requires the User to provide two or more verification factors in order to log in to your account. Rather than just asking for a username and password, MFA requires additional verification factors, which decreases the likelihood of a successful cyber attack.

Updox Admin(s) will have the ability to decide whether this will be a requirement for all Users within a Practice/Pharmacy or not. If not deemed to be a User-wide requirement, individual Users will also have the opportunity to set up MFA individually.

Security Settings “Hub”

Updox Admin(s) will have an additional settings tab within Updox (Menu → Admin) for security settings. This menu will be the central hub for IP Address safelisting (for Practices/Pharmacies that use a VPN), resetting Users' passwords, and much more.

Non-Updox Admins will also have their own individual security settings tab with Updox. Similar options will be available and any changes will only be made to that specific User's account, rather than affecting the entire Practice/Pharmacy. This ensures each individual User has the ability to customize the security of their account in whichever way they desire.

NOTE: *When the settings hub comes, then the updated password requirements will be in place. Further information/communications will be provided upon release*

Future Password Requirements

In our efforts to ensure our customers have the utmost security, we will be increasing our minimum requirements for our passwords. Updox *will not force you* to change your password upon our migration to Keycloak, although, *we very strongly recommend that you take initiative in strengthening your password.*

Be sure that each of the following criteria are met when updating your password:

- Minimum length of 12 characters
- Must include one special character
- Must include one uppercase character
- Must include one lowercase character
- Must include one digit
- Cannot reset their password to any of their last 5 used passwords
- Cannot have more than three consecutive, identical characters. For example, “Password123\$\$\$\$” *is valid*, but “Password123\$\$\$\$\$” *is not valid* because there are more than three “\$” characters in a row
- Cannot match any “commonly used or hacked” passwords maintained in a list that we source from security organizations

As other changes are implemented or become available we will let you know. In the meantime if you have any additional questions please reach out to [support](#).

Video Chat 2.0 IS HERE!!!

As telemedicine and virtual care have become a common part of the healthcare landscape, practices need the tools to create a mutually beneficial patient/provider experience.

Updox's new solution, Video Chat, does just this. With Video Chat, you can expect:

- More intuitive and comprehensive waiting room user experience
- Patient connectivity status
- Group calls accommodating up to 12 participants
- Public waiting room URLs to support urgent care or on demand telehealth visits
- Increased host controls including the ability to add participants into ongoing video chat sessions.
- HIPAA-compliant environment

Want to know more? Check out the Webinar below for a more in-depth showcase!

May 2022

May 2022 – What's New?

Added 'Chat Support' Button to the Updox Inbox

We have added the ability for you to reach out to our Customer Support directly from your Inbox! The "Need Help" button will be located in the *bottom-right* corner of your screen.

When reaching out to our Support team, please ensure that you have your **AccountID** at the ready! This can be found in the *bottom-left corner* of your screen!

NOTE: If you do not see the button pictured above, please disable any AdBlocker plugins that you may have running as the AdBlocker will prevent this button from appearing!

Exciting Update COMING IN JUNE!!!! Stay tuned...

April 2022

April 2022 – What's New?

Inbox: Folder Items Will Fully Display AM/PM

All folder items will now *always* display the AM/PM of the create date/time -- regardless of what the page zoom is to omit any potential confusion for you!

We Have More Fun and Exciting Updates COMING SOON!!!!

March 2022

March 2022 – What's New?

Faxing: Marking as Spam/Not Spam is Now Tracked in the Audit Trail

When an Item in your Inbox is either marked as Spam, Not Spam, or the Number was added to the Blocklist, it will now be documented within the item's audit trail.

This allows for office's to easily find out when a Fax Number was marked as Spam, which User was responsible for the action, and the exact date and time the action was completed.

New Logout Page & Confirmation

Upon logging out, you will be redirected to our new Logout screen, confirming that you have successfully logged out and to close any other Updox tabs or windows. You will also have a button labeled "Return to Login Page" which when clicked, you will be redirected back to the Log-In page to proceed as usual!

The security of our customers is priority at Updox. By reminding you to close out of *all* Updox tabs or windows and providing confirmation that your Log Out process was successful will only assist with the protection and security of your account.

February 2022

February 2022 – What's New?

New Inbox Buttons – Appearance and Functionality

The new "Inbox Buttons" feature now grants you the ability to *choose* which "action buttons" are present and the order they are presented next to an item within your Inbox! The new Inbox Buttons give you the ability to personally choose how your account looks and operates to best optimize your office's workflow.

Take charge now and tailor your Inbox to meet your needs, rather than the other way around!

Previously hidden buttons (such as "Route Item") can now be accessed in less clicks. In addition, the redesigned interface for the Inbox Buttons provide easier navigation and are more visually appealing.

Customizability is only available to Updox Admins, although any change(s) made will be reflected within the Inbox for all Users.

The “More” Button

“Actions” has been renamed to “Page”

Buttons listed under the “Actions” button previously only affected Inbox items containing pages or attachments. With the interface being updated, we found a perfect opportunity to update the button title to better suit the intended capabilities of those actions. Additionally, we have combined the “Options” and “Actions” buttons into a single button labeled as “More” to eliminate any potential confusion for our Users!

When the “More” button is clicked, a new drop-down will appear on the right-hand side with both “Options” and “Pages” panels available.

“Options” Panel

The “Options” panel will include any items that have not been selected to be displayed. These hidden items also have the ability to be re-ordered.

“Pages” Panel

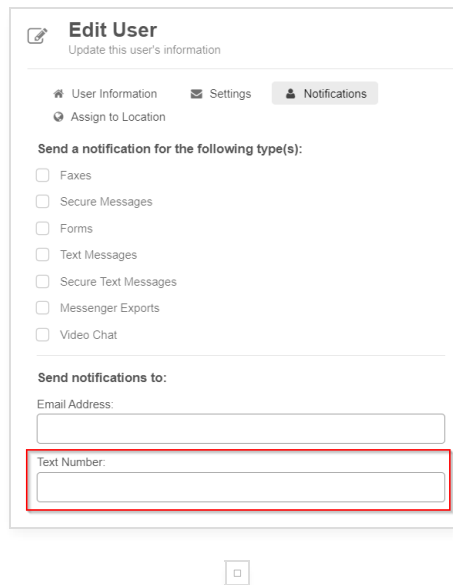

The “Pages” panel will only appear when the item contains attachments since these actions can only performed when those are present.

For additional information on setting up and using the Inbox Buttons, visit [How to: Customizing the Inbox Buttons \(insert link\)](#)

Updox Admins: Added Ability to Set "Text Notifications" for Your Non-Admin Users

Updox Admin's now have the ability to view and edit their other Users' notification settings for text messages.

Previously, this setting could only be accessed from within the specific User's settings (*Menu → Profile → Notifications*).

Reminders: HIPAA Warning Message for Email, SMS, and Computer Voice Scripts

We have added additional warnings to the various features surrounding Reminders to ensure the potential distribution of PHI and non-HIPAA compliant information is non-existent.

Some of the warnings include:

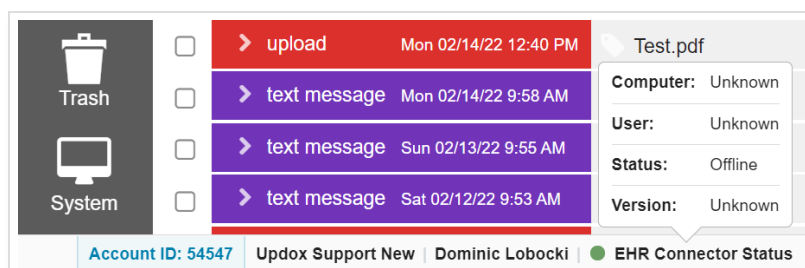

- Ensuring you do not include *any* PHI within the your Reminders' scripts
- Reminding you to be careful that the appointment type(s) do not reflect *any* PHI information

NOTE: Our email and SMS reminders are plain emails and SMS texts – they are not designed to be secure to hold PHI at this time. The same warning is the same for each script type.

Inbox Footer – Visual Update

The footer has been updated to show: Account ID (PID), Account Name, the User's Name, and the status of their EHR Connector. In addition, the color of the bar has been updated from dark grey to a lighter grey to better visibility.

This change was made to expedite troubleshooting times between you and our Customer Support when in need of assistance.

It is extremely important that our Support team is able to obtain and confirm your Account ID prior to assisting to best minimize potential instances of breaching HIPAA or security of your account.

January 2022

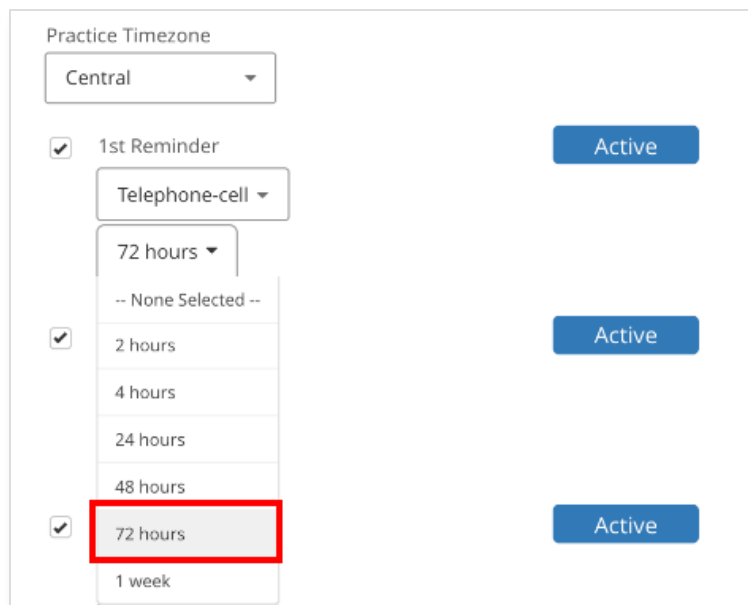

January 2022 -- What's New?

Reminders: Added a '72 Hour' Option

A "72 hour" option has been added to time selection dropdown for Reminders, allowing practices to schedule reminders to go out three days before an appointment.

Previously, "48 hours" was the second longest option in advance for reminders which presented communication issues between the office and patient depending on the day of the scheduled appointment.

For example, if a patient has an appointment on a Monday, the "48 hour" option will be sent out on a Saturday when the office could be closed and unable to handle confirmations/reschedules/cancellations ahead of appointment day.

The screenshot shows a configuration panel for reminders. At the top, there is a 'Practice Timezone' dropdown set to 'Central'. Below this, there are three reminder settings, each with a checked checkbox and an 'Active' button:

- 1st Reminder:** The dropdown is set to 'Telephone-cell'. The time dropdown is open, showing '72 hours' selected and highlighted with a red box. Other options include '-- None Selected --', '2 hours', '4 hours', '24 hours', '48 hours', and '1 week'.
- 2 hours:** The time dropdown is set to '2 hours'.
- 72 hours:** The time dropdown is set to '72 hours'.

NOTE: The "Blackout weekends" options should also be enabled to ensure any 72hr reminder is delivered on a weekday.

Located under: Menu → Admin → Reminders → Scroll down)

Blackout weekends

Added a Forms 'Dropdown Menu' in the Compose Window

We have added the ability to quickly and easily add your Forms links when emailing customers within the Compose window!

You will find this dropdown to the right of the "Templates" drop-down! Clicking the Form within the dropdown menu will paste the Form Name and Link at the bottom of your body message.

Rather than needing to manually copy and paste these links when emailing, the drop-down menu is now available just as it is when sending a text message!
