

EHI Export: Overview

Last Modified on 12/19/2023 11:18 am EST

EHI Export Overview

The EHI Export product provides self-service access to export data from Updox at a practice or patient level in accordance with the 21st Century Cures Act.

Users who have Admin access in Updox will be able to select the data they wish to export within a selected date range. Once the request is processed, you will be able to download your files from within the EHI Export Dashboard. Note that the individual files from your request will be compiled into folders compressed within ZIP files.

Ready to use it? Check out our [articles](#) for more information on what to do next.
