

# Get Started with Updox Patient Portal

Last Modified on 02/10/2026 1:14 pm EST

[Patient Portal features](#) | [Portal account setup](#) | [Log in for the first time](#)

The Updox Patient Portal gives you secure, convenient access to your health information, appointments, and easy communication with your care team.

## Patient Portal features

You can use the Updox Patient Portal to:

- Exchange messages with practice staff.
- Fill out forms and email them to the practice.
- Set up accounts that allow family members to view your health information.

The following features may not be available for all portal users.

- View past and future appointments.
- Schedule an appointment.
- Submit a refill request.
- View, download, or email clinical summaries.
- Request the most recent health record.

## Portal account setup

Your practice creates a Patient Portal account for you and sends login information (username, temporary password, and login link) in a registration email.

You can access the Updox Patient Portal by using the login link provided in the registration email.

## Log in for the first time

1. Select the login link provided in your portal registration email.
2. Enter your username and temporary password.
3. You're prompted to create a new password and verify your account using your date of birth.

Once you've logged in, your **Home** tab is open by default.
