

Updox IP Addresses

Last Modified on 05/08/2026 1:39 pm EDT

Updated IP addresses as of May 1st, 2026

If you currently include Updox IP addresses in your firewall or network allowlists, you must add the following IP addresses.

3.173.44.25	3.173.43.25	3.173.42.25	3.173.41.25	3.173.40.25	3.173.39.25	3.173.38.25
3.173.37.25	3.173.36.25	3.173.35.25	3.173.34.25	3.173.33.25	3.173.32.25	3.173.31.25
3.173.30.25	3.173.29.25	3.173.28.25	3.173.27.25	3.173.26.25	3.173.25.25	3.173.24.25

Failure to update will result in service disruption.

If you do not allowlist our IP addresses, no action is required.

What is an allowlist / allowlisting?

Allowlisting is a cybersecurity practice that creates a list of approved, trusted applications, IP addresses, or users, permitting only them to access a network or run software while blocking all others. It operates on a "deny-by-default" principle, significantly enhancing security by reducing the attack surface.
